Forecast for Thursday 08 Apr 2021

Weather: Low cloud and drizzle will bring mist, hill fog and poor visibilities first thing. Conditions become clearer with some sunny spells developing by lunchtime. The afternoon and overnight will be dry but mostly cloudy.

Chance of cloud free mountain/hill tops above 600m: Less than 10% improving to 80% in the afternoon as rain/drizzle clears.

Visibility: Extensive cloud in the morning with bases 400-600m, lowest on western facing slopes. Visibility becoming excellent by lunch time as cloud lifts and breaks up for a time. Cloud bases lowering to 900m by the evening, covering the highest peaks.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Once the poor visibility clears through the morning it will be a decent day and will feel warmer than recent days particularly in any sunshine, though it will be windy on hill tops so pack layers.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Thu 08 Apr 2021	0mm	0.8mm	1mm

Forecast for Friday 09 Apr 2021

Weather: A cloudy start on Friday, soon turning wet and colder with low cloud, rain and sleet arriving from the north. Remaining cloudy through the rest of the day but rain/sleet turning patchier by the afternoon.

Maximum wind: Westerly, becoming northerly by mid-morning, 10mph with gusts 30mph.

Chance of cloud free mountain/hill tops above 600m: Less than 40% becoming less than 10% by lunch time improving to 40% by the evening.

Visibility: Visibility will deteriorate as cloud bases lower to 500-800m by lunchtime with sleet and snow, improving at times through the afternoon in any cloud breaks but remaining poor in any rain/sleet and on the highest peaks.

Temperature: **Valleys:** Plus 7 Celsius becoming Plus 1 Celsius overnight
At 600m: Plus 1 Celsius becoming Minus 2 Celsius overnight.
Freezing level: 1000m becoming 800m by lunchtime and 600m overnight.
